SPEC SHEET 1004-001 E
SECTION : 1000
Effective : June 2012
Replaces : New

TM SERIES Mouvex Technology Eccentric disc pump

Legendary ruggedness

- Low pump rotation speed and self-wear compensation ensure long life span and preserved original performance over time.

Demonstrated performance

- Self-priming (without foot valve), constant flow (despite variable viscosity or pressure) are essentials characteristics.

The reassuring answer

- Adapted heating fuels or heavy fuels transfer units, designed for intensive duty.

Mouvex reserves the right to modify the information and illustrations contained in this document without prior notice. This is a non-contractual document.

TM SERIES - Mouvex Technology - Eccentric Disc pump

● Features

SINGLE PUMPING SETS

Positive displacement eccentric disc pumps, self priming. With integrated adjustable relief valve (except AP)

Perfect sealing by mechanical seal.

Direct drive (AP) or belt / pulley drive with housing.

DOUBLE PUMPING SETS

Sets made of two parallel systems connected by suction and the discharge pipes (check valves integrated to discharge pipes).

Each system includes an electric pumping set protected by a strainer and isolated by two valves. The two system are mounted on a common baseplate with insulating pods.

Such sets offer:

- The **safety** of failure-free operation, thanks to a double circuit.
- The **time saving** at the order and the installation.
- The **guarantee** of the material developed down to the smallest accessories by the constructor.

Pump Type	Flow l/h	Manometric total elevation bar	Manometric suction height bar	Hardware Motor		Code
				kW	Simple units	
AP	150	4	0,5 bar Losses including charges	0,18	Albi*	Albi double*
	150	4		0,12	Albi mono*	Albi mono double*
	300	4		0,18	Amiens*	Amiens double*
	300	4		0,12	Amiens mono*	Amiens mono double*
AB	600	5		0,37	Biscarosse	Biscarosse double
	600	5		0,37	Biscarosse mono	Biscarosse mono double
	850	5		0,37	Boulogne	Boulogne double
	850	5		0,37	Boulogne mono	Boulogne mono double

	4400	4,5	1,1	AFTM 460 bis	AFTM 460 bis double	

*Do not use for FOL N° 2
For each variant (flow, heigh suction, temperature, viscosity...) consulting us.

TM SERIES - Mouvex Technology - Eccentric Disc pump

● Units type selection

FILLING THE TANK DAILY

Pump nominal flow can be including 5 or 10 times hourly consumption of powered burners.

FEEDING A RUNNING LOOP

Pump robustness ensures many years on continuous duty, 24 hours a day. Pump nominal flow rate should correspond to about 2 times the maximum consumption of all burners together. After last burner, put a Mouvex control valve (see specific brochure) which keep constant feeding and pressure in the loop, in despite of variable burners consumption.

ROOF TOP BOILER ROOM

Please consult our application department.

● Accessories

REGULATION VALVE

(view on specific manual)

Valve	Flow m³/h	Reference pressure (bar)						Tapped hole
		Spring						
		N° 0	N° 1	N° 2	N° 3	N° 4	N° 5	
N° 0,5	0 à 0,3	-	0,5 à 0,9	0,9 à 1,8	1,8 à 3	2,2 à 3,7	3,2 à 4,5	G 1/2
N° 1	0 à 1,5	0,35 à 0,75	0,75 à 1,6	1,6 à 3,1	2,4 à 4,6	4 à 6	-	G 1
N° 1,5	0,5 à 2,5	-	1,2 à 1,8	1,8 à 2,8	2,5 à 3,9	3,6 à 5,6	-	G 1 1/2
N° 2	0 à 15	-	0,5 à 1	1 à 2,2	1,2 à 3,2	1,7 à 4,7	2,5 à 6,5	G 2

PREFILTER

Essential to protect the pump against an accidental passage of foreign body.

All the prefilter could be flange directly on the suction flange of the pump, simplifying the assembly.

Pump	Prefilter
AP	Incorporate prefilter
AB	PF 25
AG	PF 40 AG
AF	PF 40 AF

BREAKER BOX

This unit is essential to the protection of the electric motors, it could, on request, include a relay for remote control by float switch or by pressure switch.

Do not omit to precise, relay on order, exact voltage of the motor network power.

NB : presence of contactor- breaker conditions our guarantee.

AUTOMATIC SWITCH BOX

Control box and protection for automatic start.
