

2" NON-METALLIC PUMPS

The 2" (51 mm) Air Operated Diaphragm Pumps made of injected moulded plastic parts can reach a flow rate up to 650 l/min (172 gal/min). They are available in natural or conductive polypropylene and PVDF for optimum fluid compatibility and corrosion resistance.

Lateral offset inlet and outlet ports to avoid eventual material leaks onto the pump footprint. The discharge and inlet manifolds can rotate 180° for maximum pump installation versatility. The flanged bolted ports meets both DIN and ANSI standards.

These pumps are used for transferring, filling and batch dispensing in a variety of industries.
