

SENSiT[®]

Smart tank level monitoring, wherever you are, whenever you want

NEW

The SENSiT[®] is the new smart Wi-Fi product that enables remote monitoring of the liquid level in the tank anywhere and anytime using a smartphone or tablet.

Thanks to the intuitive mobile application, the device will notify about the level change of stored liquid, including detection and alert of a sudden drop in level which could be a sign of a leak.

SENSiT[®] also allows you to monitor the consumption of liquid in the tank over time, informing about the expected run out date and the average consumption during the day.

Technical Data

Dimensions	84 mm x 25 mm x 15 mm
Weight	40 g
Housing Material	Plastic
Operating Temperature	-10°C ÷ +60°C
Environmental Protection	Indoor use only
Wireless Connectivity	Wi-Fi 2,4 GHz / RF 433 MHz
Sensor to Modem Radio range	200 m (433 MHz)
Power requirements (DC)	5 V DC
Power Connector	USB A
Status Indication	RGB LED
Sensor Synchronization	Via App (Android, iOS)
Warranty	2 Years

SENSiT[®] benefits

- Enables to remotely monitor the sensor thanks to an intuitive mobile app
- Delivers data at a determinable schedule, including average consumption, projected run out date as well as consumption graphs over the last year
- Immediate threshold broken notification (high/low level)
- Powered by USB port
- Remote firmware upgrade

SENSiT[®] is a proven solution that works with:
