MAIN FEATURES SSM AGILIS

SSM Agilis upgrades Piusi's historic MC system and SSM 2018 software through:

- A software update that incorporates
 - The functionality of **virtual tanks**
 - The ability to **customise reports** according to specific needs
 - The **new fresh and up-to-date graphic design**

MAIN FEATURES SSM AGILIS

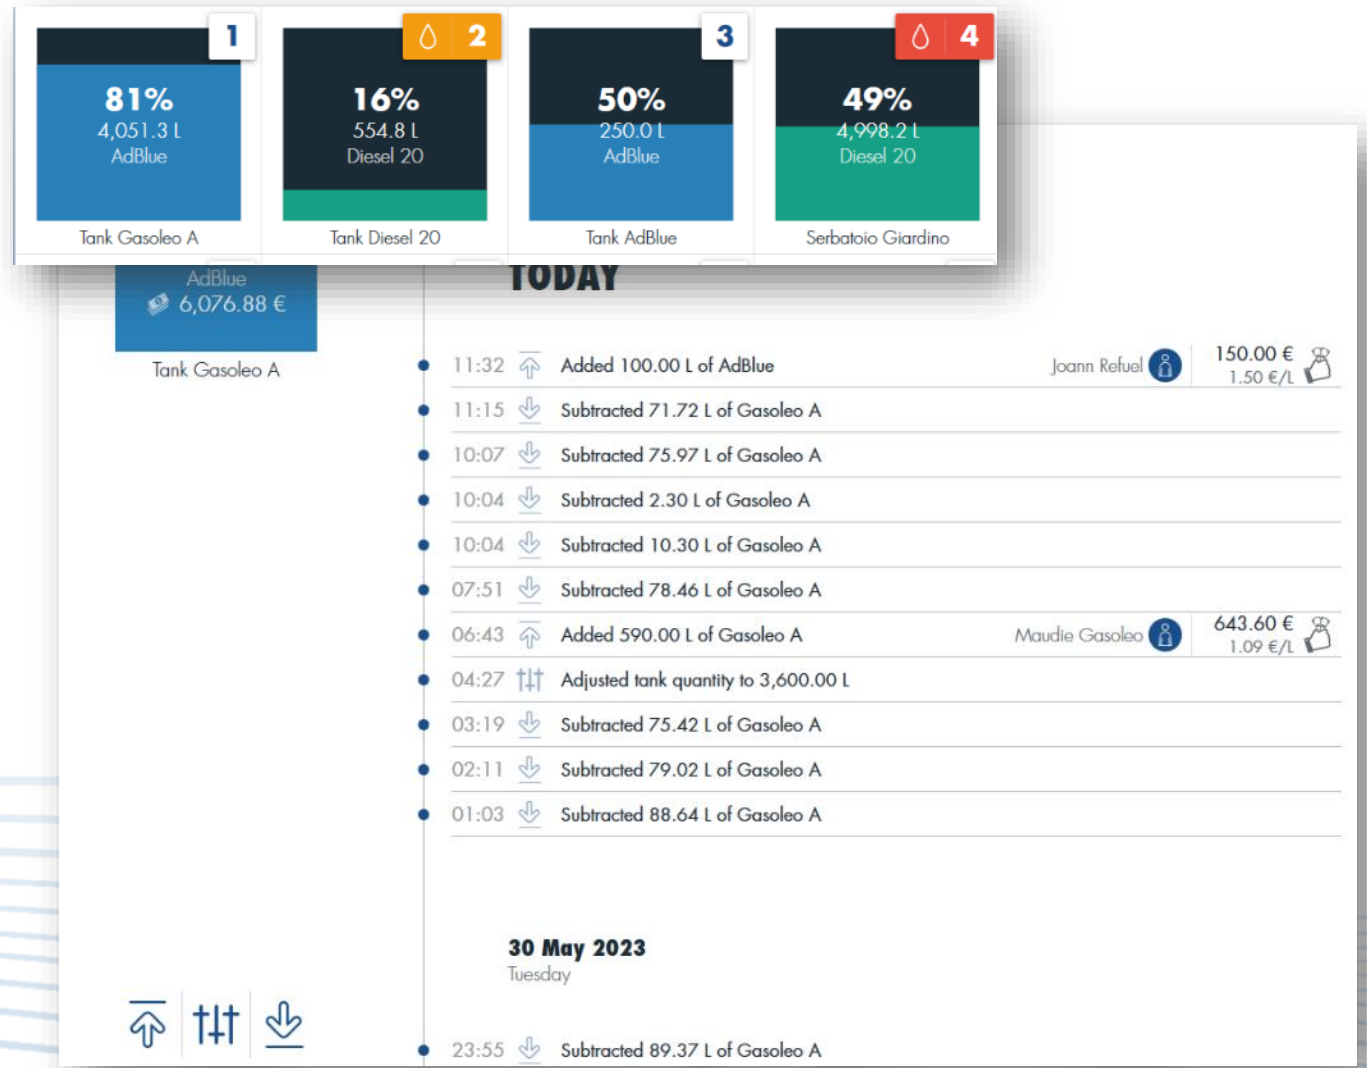

- The **hardware** upgrade that allows
 - The expansion of the memory and the possibility of adding **up to 250 users** on the same dispenser
 - The incorporation of **15 languages*** pre-loaded on the panel
- New graphics on the dispensers that allow PIUSI products to be recognised by the name on the product plate

*English, Italiano, Francais, Deutsch, Portuguese, Español, Cesky, Dansk, Norsk, Nederland, Polskie, Romana, Slovenscina, Swedish, Magyar

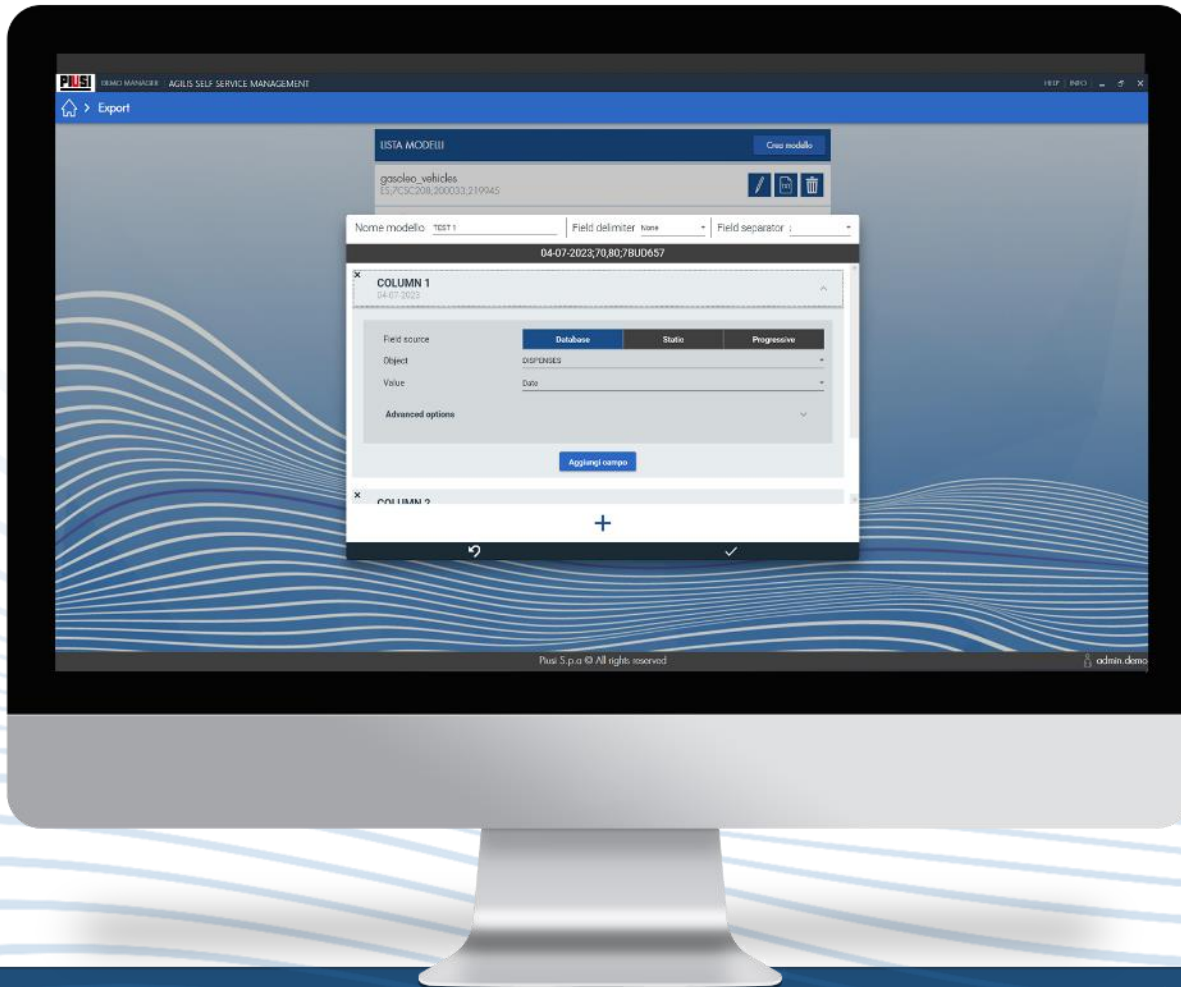

VIRTUAL TANKS

- The virtual tank is created by entering the tank capacity in litres
- The virtual/calculated tanks works with manual tank-loads: the manager receives a fuel delivery and enters it into the system
 - It is possible to enter the cost of the fuel and the supplier chosen
 - The cost of the fuel will be used to calculate the inventory value. The calculation will use the latest cost inserted
- The system automatically deducts the transactions from the total fuel inventory
- It is possible to configure the alarms that will appear in the software once the fuel dispensing are loaded into the system. Alarms are software-based, they do not operate on the dispenser
- It is possible to insert fuel loads/unloads and adjustments

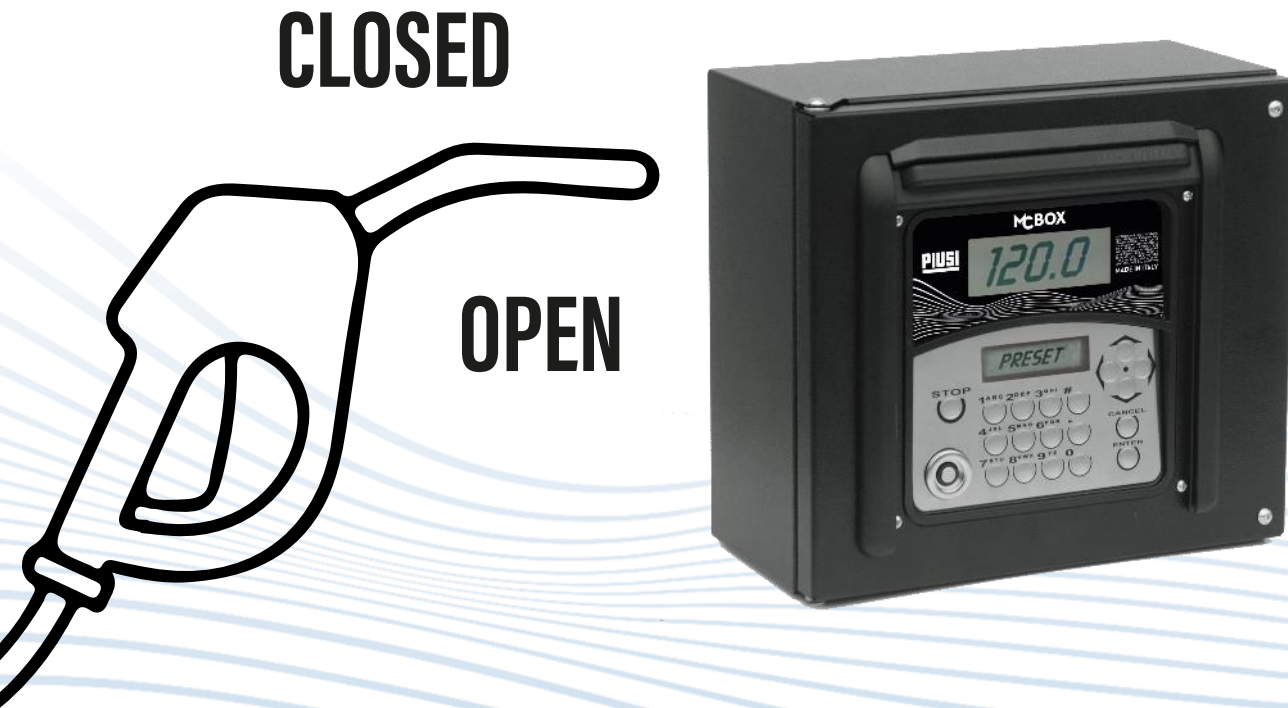

CUSTOMIZABLE EXPORT

After creating a customisable export in .TXT format, it is possible:

- To choose the information to be exported and the field delimiter separator;
- To save the customised report and use it in the future

MCBOX – NOZZLE CONTACT

- On the AGILIS MCBOX it is possible to configure - from the system menu - the nozzle contact in the configurations:

normally open or normally closed

SSM AGILIS – COMPATIBILITY

FAQ

I have a dispenser installed few years ago and I would like to update the software to the new Self Service Management AGILIS. Is this possible?

- Yes, all Cube MC, Self Service MC, Self Service Adblue MC and MCBOX devices on the market are compatible with the new SSM AGILIS software.

I have some SSM 2018 software in stock, can I combine them with the new AGILIS devices?

- Of course, the new Cube MC Agilis, Self Service MC Agilis, Self Service Adblue MC Agilis and MCBOX Agilis are compatible with SSM2018 Software

SSM AGILIS – SSM2018 SERVICE

- **We guarantee the service on SSM2018 software until 30/12/2030**
- **Major patches only (SQL/OS compatibility)**
